PERSONAL DETAILS

- Name: **Hieu Ngo Minh**
- Designation: .Net Software Engineer
- Date of Birth: 22-09-2000
- Email: maaur2ks@gmail.com
- Phone: 0376020239

EDUCATIONAL BACKGROUND

Hanoi National University of Education (HNUE)- Information Technology (2018-2022)

FPT Software Academy(2022)

CERTIFICATES

- Microsoft Certified: Power Platform Developer Associate (2025)

- Use Generative AI as Your Thought Partner (2024)

PROFESSIONAL SUMMARY

- More than 3 years of experience in Software Development.
- Strong working knowledge of developing web applications (Asp .Net, Winform, .Net API…).

TECHNICAL SKILLS

Back-end developer: Visual Basic C#, .Net Core and Framework, .Net Entity Framework, ASP .Net Core, ASP .Net MVC, Java Spring boot, Golang, SQL Server, MySQL, PostgreSQL.

Other: jQuery, Ajax, Git

LANGUAGE SKILLS

- English   General Professional Proficiency
- Japanese   Elementary Proficiency

EMPLOYMENT HISTORY

06/2022 – Now : FPT Software

PROFESSIONAL EXPERIENCE

Nicho _2025	
Duration	12/2024 - now
Team Size	33
Position	Member
Description	Nicho _2025 is maintenance project with 3 sup-project
	"App" is responsible for managing common functions, database.

Responsibility	- **Maintaining Documentation**: Created and continuously updated comprehensive technical documentation to support team knowledge sharing and maintain consistency in project delivery - **Development:** Receive tickets from customers, then investigate, evaluate feasibility and implement new functions. when the system fails, investigate old systems, detect discrepancies - **Collaborating Across Teams:** Engaged in cross-functional collaboration with back-end developers, ensuring seamless integration and interoperability of system components
Technology	- **Development Languages**: C# - **Database**: Microsoft SQL Server - **Framework**: .Net framework 4.x, .Net core 6, Visual Basic 6, Entity framework - **DevOps Tool**: IIS, Azure - **Code quality/Basic Security**: SonarQube, Coverity, OAuth 2.0

Nagase	
Duration	11/2024 - 01/2025
Team Size	449
Position	Member
Description	Web-based logistics management system
Responsibility	**Documentation**: Create documentation based on customer requirements, ensuring that development can be done correctly with the legacy system
Technology	- **Development Languages**: C# - **Database**: Microsoft SQL Server - **Framework**: Windows form

JPRO_ODC _2025	
Duration	10/2024 - 12/2024
Team Size	27
Position	Member
Description	JPRO_ODC _2025 is maintenance project with 3 sup-project "App" is responsible for managing common functions, database.
Responsibility	- **Maintaining Documentation**: Created and continuously updated comprehensive technical documentation to support team knowledge sharing and maintain consistency in project delivery - **Development:** Receive tickets from customers, then investigate, evaluate feasibility and implement new functions. when the system fails, investigate old systems, detect discrepancies

	- **Collaborating Across Teams:** Engaged in cross-functional collaboration with back-end developers, ensuring seamless integration and interoperability of system components
Technology	- **Development Languages**: C# - **Database**: Microsoft SQL Server - **Framework**: .Net framework 4.x, .Net core 6, Visual Basic 6, Entity framework - **DevOps Tool**: IIS, Azure - **Code quality/Basic Security**: SonarQube, Coverity, OAuth 2.0

JPRO_ODC	
Duration	07/2024 - 10/2024
Team Size	53
Position	Member
Description	JPRO_ODC is maintenance project with 3 sup-project "App" is responsible for managing common functions, database.
Responsibility	- **Maintaining Documentation**: Created and continuously updated comprehensive technical documentation to support team knowledge sharing and maintain consistency in project delivery - **Development:** Receive tickets from customers, then investigate, evaluate feasibility and implement new functions. when the system fails, investigate old systems, detect discrepancies - **Collaborating Across Teams:** Engaged in cross-functional collaboration with back-end developers, ensuring seamless integration and interoperability of system components
Technology	- **Development Languages**: C# - **Database**: Microsoft SQL Server - **Framework**: .Net framework 4.x, .Net core 6, Visual Basic 6, Entity framework - **DevOps Tool**: IIS, Azure - **Code quality/Basic Security**: SonarQube, Coverity, OAuth 2.0

IDO_Tool	
Duration	04/2024 - 07/2024
Team Size	47
Position	Member
Description	Develop tool used in FSoft
Responsibility	- **Development:** Implement PM's ideas into the web, contribute ideas to improve the logic of the project
Technology	- **Development Languages**: Java Spring boot

	- **Database**: PostgreSQL

Sugar	
Duration	02/2024 - 03/2024
Team Size	92
Position	Member
Description	Project to develop a shipping inventory management system for Customer Hokkaido. Scope of work includes from Coding, UT
Responsibility	- **Development:** Develop the code according to the customer's business design requirements. - **Collaborating Across Teams:** support tester confirm test case and create data
Technology	- **Development Languages**: Java Spring boot - **Database**: PostgreSQL

JPRO_O	
Duration	11/2023 - 02/2024
Team Size	344
Position	Member
Description	JPRO_O is the maintenance and development project of JPRO3
Responsibility	- **Development:** Investigate and fix errors between documentation and source code, documentation and old source code, support team fix bug - **Documentation**: Create Detail Design base on ticket of customer and Basic Detail - **Collaborating Across Teams:** Support tester creates data
Technology	- **Development Languages**: C# - **Database**: Microsoft SQL Server - **Framework**: .Net framework 4.x, .Net core 6, Visual Basic 6, Entity framework - **DevOps Tool**: IIS - **Code quality/Basic Security**: SonarQube, Coverity, OAuth 2.0

JPRO3	
Duration	03/2023 - 11/2023
Team Size	972
Position	Sub Leader
Description	JPRO3 is an expansion project of JPRO2
Responsibility	- **Development:** Develop the code according to the customer's business design requirements. Investigate old systems, detect discrepancies and support connection screen task progress

	- **Documentation:** Validate document with old source code
	- **Collaborating Across Teams:** support tester confirm test case and create data
	- **Support Team Member:** Provided training on technologies, manage
Technology	- **Development Languages**: C#
	- **Database**: Microsoft SQL Server
	- **Framework**: .Net framework 4.x, .Net core 6, Visual Basic 6, Entity framework
	- **DevOps Tool**: IIS
	- **Code quality/Basic Security**: SonarQube, Coverity, OAuth 2.0

JPRO2	
Duration	10/2022 - 03/2023
Team Size	204
Position	Member
Description	Develop a pharmacy website
Responsibility	- **Development:** Develop the code according to the customer's business design requirements.
	- **Collaborating Across Teams:** support tester confirm test case and create data
Technology	- **Development Languages**: C#
	- **Database**: Microsoft SQL Server
	- **Framework**: .Net framework 4.x, .Net core 6, Visual Basic 6, Entity framework
	- **DevOps Tool**: IIS
	- **Code quality/Basic Security**: SonarQube, Coverity, OAuth 2.0

KEIRYOUKI	
Duration	10/2022 - 10/2022
Team Size	47
Position	Member
Description	Project to develop asset inspection management system of Customer.
Responsibility	**Development:** Coding Modules From PM
Technology	Java spring boot

VN-Warranty	
Duration	06/2022 - 09/2022
Team Size	133
Position	Member
Description	The project is open to implement the warranty part for all projects in the VN market (TOTO-VN, SHIV, DMVN,..)
Responsibility	- **Development:** Coding Modules From PM
Technology	- **Deployment:** Visual Basic 6, jQuery, HTML, CSS

	- **Database:** Microsoft SQL server
